Eukalyptusgrün
U604

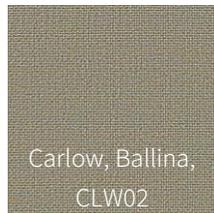

Eukalyptusgrün

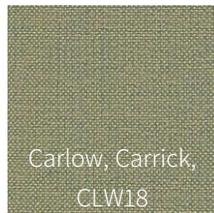

U604

Grün ist Natur und steht deshalb **wie keine andere Farbe für Nachhaltigkeit**. Im sogenannten “Biophilic Design” werden Räume oft **mit** Abstufungen vieler **gedeckter Grüntöne** gestaltet, die zusammen mit natürlichen Materialien die **Vielfalt der Natur** widerspiegeln. U604 Eukalyptusgrün ist eine **kühlere Variante dieser vergrauten Grüntöne**, die zeitlose Mitspieler in vielen Kombinationen sein können. Zusammen mit Hölzern in mittleren bis hin zu dunkelbraunen **Naturtönen** wirkt dieses Grün sehr **natürlich und elegant**, zu hellen Hölzern bietet die Kombination eine **frische Natürlichkeit**.

Rostrot
U335

Unifarben in rötlicher Anmutung sind **derzeit sehr beliebt**, da sie **Nähe und Privatheit in den Raum** bringen. Das kann besonders in '**New Work**'-Büros oder im **Hospitality-Design** sehr spannend sein. Das U335 Rostrot ist ein Rotton, der zwar intensiv aber dennoch nicht zu bunt wirkt. Durch den Einsatz von **gräulichen Pigmenten** erscheint dieses Unidekor sehr wertig und ermöglicht eine Vielzahl an Kombinationsmöglichkeiten zu Holz- sowie auch Materialdekoren. Es kann aber auch Ton-in-Ton mit anderen rötlichen Unifarben kombiniert werden.

Rostrot

Alpenseebrau
U504

RAL Design 250 30 15

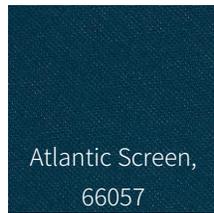

Das dunkle U504 Alpenseebrau gehört zu den **graublauen Farbtönen**, die aufgrund ihres **gedeckten Charakters harmonische Kombinationen** zu natürlich-modernen Hölzern mit Grauanteil bilden. Im **skandinavischen Design** sind diese Farben oft in Kombination **mit weißen und hellen Hölzern** zu finden. Es ist aber ebenfalls gut in **Farbreihen zwischen Blau- und Aquatönen** einzusetzen.

Beigegräu
GD U16001

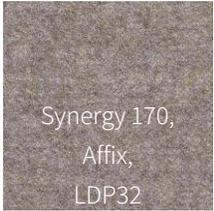

Der gedeckte Farbton Beigegrau vereint warme Beige- und kühle Graunuancen zu einer subtilen, eleganten Farbwirkung. Dank seiner neutralen Ausstrahlung eignet er sich hervorragend als Basis- oder Akzentfarbe in modernen Interieurs. Besonders harmonisch wirkt er in Kombination mit natürlichen Materialien wie hellen Hölzern, Sandstein oder Beton. Im skandinavischen und minimalistischen Design sorgt er für eine ruhige, ausgewogene Atmosphäre, während er in klassischen oder ländlichen Stilrichtungen als sanfte Verbindung zwischen warmen und kühlen Farbtönen dient.
